INDEPENDENT AUDITOR'S REPORT

Board of Trustees
Wheatland Township
Naperville, Illinois

We have audited the financial statements of the governmental activities, major funds, and remaining fund information, which collectively comprise the basic financial statements and the schedules of revenues, expenditures and changes in fund balance – budget and actual and of expenditures – budget and actual for the General Town Fund and major Special Revenue Funds of **Wheatland Township** as of and for the year ended March 31, 2011, as listed in the table of contents. These financial statements are the responsibility of the Township's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the general purpose financial statements are free from material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the general purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall general purpose financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the basic financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, major funds, and remaining fund information of Wheatland Township as of March 31, 2011, and the results of its operations of those activities and funds and the budgetary comparison for the General Town Fund and major Special Revenue Funds for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

The Management's Discussion and Analysis and schedule of funding progress listed in the table of contents are not a required part of the basic financial statements, but are supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was made for the purpose of forming an opinion on the basic financial statements taken as a whole. The accompanying financial information listed as supplementary information in the accompanying table of contents is presented for purposes of additional analysis, and is not a required part of the basic financial statements of Wheatland Township. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly presented in all material respects in relation to the basic financial statements taken as a whole.

We did not audit the statistical information listed in the table of contents and, therefore, express no opinion thereon.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Wheatland Township
Management's Discussion and Analysis
March 31, 2011

The Wheatland Township provides the following overview and analysis of the Township's financial operations and attached financial statements for the fiscal year ended March 31, 2011. The following discussion is presented to enable the readers to more fully understand the accompanying audited financial statements. The Township is responsible for the fair and accurate presentation of all financial information, as well as the internal controls and reporting procedures in creating the financial statements. In management's opinion, the financial statements herewith reflect all material aspects of the Township's operations in an accurate, fair and complete manner.

The financial statements are prepared in accordance with generally accepted accounting principles (GAAP), and follow the guidelines of the Governmental Accounting Standards Board (GASB). In 1999, GASB adopted Statement Number 34, "Basic Financial Statements – and Management's Discussion and Analysis – for State and Local Governments." This standard modifies the required reporting for the Township, requiring full accrual accounting, including the reporting of all capital assets net of depreciation. The modifications to the Township required the additional reporting of capital assets, depreciation and compensated absences payable in the government-wide financial statements.

The major components of the financial statements are the overall statement of net assets and the overall statement of activities. The statement of net assets shows the amount that total Township assets exceed total liabilities, which may be considered the current value of net worth for the Township. The statement of activities reflects the overall operations of the Township for the past year, excluding revenues from taxes, interest and miscellaneous items. This demonstrates how effectively the Township operates on a business level model. In simple terms, it shows how the Township would fair as a business, without the support of auxiliary revenues.

The Township's total assets exceeded total liabilities by $6,380,621. At this time, the Township had total capital or infrastructure assets net of depreciation of $4,122,625. Of the Township's net assets, at the end of the year, $2,257,996 was available to fund future operations. Of this amount, $33,785 is restricted for general assistance, $688,487 is restricted for highways and streets (including bridges), and $1,535,724 is unrestricted.

Overview of the Financial Statements

The financial statements have three major components: (1) government-wide financial statements, (2) fund financial statements, and (3) notes to the financial statements.

Additional required supplementary information includes the schedule of funding progress for the Illinois Municipal Retirement Fund, the Township's state retirement pension, and statement of revenues, expenditures and changes in fund balance – budget and actual for all of the Township's major funds. Supplementary information includes a combining balance sheet and combining statement of revenues, expenditures and changes in fund balance for nonmajor funds, and schedules of revenues, expenditures and changes in fund balance – budget and actual for each nonmajor fund with an adopted budget.

Overview of the Financial Statements (cont'd)

The two main components to the government-wide financial statements are: (1) the statement of net assets, and (2) the statement of activities. As discussed before, these are the two major statements that are analyzed in terms of obtaining a broad overview of the finances, value and annual operations of the Township.

The statement of net assets is a snapshot as of the end of the fiscal year, illustrating the overall value of the Township. The total net assets should be a positive number, and can be equated to the Township's total net worth. From year to year, an increase or decrease in the total net assets of the Township is one factor in determining the total overall financial performance.

The statement of activities shows the overall expenses and operating revenues for services the Township provides. Added to this are the nonoperating revenues for taxes, unrestricted investment earnings and miscellaneous items, to arrive at the total increase or decrease from operations. This amount is added to the total assets at the beginning of the year, to provide the value of the total assets at the end of the year. A decrease in net assets does not necessarily mean poor performance, as planned usage of cash on hand or fund reserves will also be reflected here.

Both of the government financial statements may be divided into two components: governmental activities, which are operations of the Township primarily supported by tax revenues, and business-type activities, which are those operations intended to be self-supportive, which have no direct attachment to providing Township services other than their own business. All of the Township's operations are considered to be governmental activities.

The fund financial statements provide reporting for the Township's operations at a fund level. A fund is a group of related accounts established for a specific purpose to maintain the control of resources for that purpose. The Township utilizes fund accounting that reports operations categorized by each of their purposes. There are three types of funds: governmental, proprietary and fiduciary. All of the Township's funds are considered to be governmental.

The focus of governmental fund financial statements is narrower than that of the Township-wide financial statements. The fund financial statements provide a more detailed look at the different operating components that comprise the government-wide financial statements. The focus at the fund level is more on current operations and short-term results, whereas the government-wide reporting allows for a greater understanding of the long-term sustainability of the Township. It is useful to compare the two types of statements for the balance sheet and the statement of revenues, expenditures and changes in fund balance to see how current operations reflect upon the long-range value of the Township. Reconciliations between the two types of statements are provided.

Notes to the financial statements provide additional information that is needed to gain a full understanding of the Township's financial operations and its reporting.

The required supplementary information provides greater detail on the Township's financial operations for all of its major governmental funds, as well as the schedule of funding progress for IMRF. The additional financial schedules provide information valuable in understanding nonmajor funds.

Financial Analysis

Condensed Statement of Net Assets

	March 31,	
	2011	2010
Assets:		
Current and other assets	**$ 4,514,894**	$ 4,241,569
Capital assets, less accumulated depreciation	**4,122,625**	3,498,264
Total assets	**8,637,519**	7,739,833
Liabilities:		
Other liabilities	**2,239,659**	2,211,465
Noncurrent liabilities:		
Due within one year	**9,362**	17,157
Due in more than one year	**7,877**	9,810
Total liabilities	**2,256,898**	2,238,432
Net assets:		
Invested in capital assets	**4,122,625**	3,498,264
Restricted	**722,272**	858,699
Unrestricted	**1,535,724**	1,144,438
Total net assets	**$ 6,380,621**	$ 5,501,401

Current and other assets consist of cash and cash equivalents ($2,319,501 and $2,065,104 at March 31, 2011 and 2010, respectively) and receivables ($2,195,393 and $2,176,465 at March 31, 2011 and 2010, respectively). Receivables consist of property taxes levied as of January 1 for the fiscal year beginning April 1 of that year. The remaining assets ($4,122,625 and $3,498,264 at March 31, 2011 and 2010, respectively) are capital assets, which are all of the infrastructure or fixed assets for the Township. These include land, infrastructure, buildings, equipment, vehicles and office equipment. These items are now depreciated over their useful lives. The significant increase in the current year is due to the construction of a salt dome facility and significant road reconstruction completed in the current year.

The largest component of the total liabilities is the deferred property tax revenue, which equals the property tax receivable balance. The taxes are levied with the intention of funding next year's activities. Therefore, all revenue is deferred on the statement of net assets.

Net assets at March 31, 2011 total $6,380,621, of which $4,122,625 represents the net amount of the capital assets less outstanding debt used to acquire them. Net assets at March 31, 2010 total $5,501,401, of which $3,498,264 represents the net amount of the capital assets less outstanding debt used to acquire them. The remaining amount each year represents the amount of funds the Township would have if all revenues were collected, and all other obligations of the Township were satisfied. As mentioned earlier, this amount is partially restricted for general assistance, and highways and streets, with the remainder unrestricted.

Financial Analysis (cont'd)

Condensed Statement of Activities

	For the Year Ended March 31, 2011	2010
Program revenues:		
Charges for services	**$ 24,008**	$ 12,329
General revenues:		
Taxes	**2,227,734**	2,178,438
Unrestricted investment earnings	**12,871**	4,484
Miscellaneous/other	**7,025**	6,887
Total revenues	**2,271,638**	2,202,138
Expenses:		
General government	**805,542**	742,023
Highways and streets	**586,876**	615,525
Total expenses	**1,392,418**	1,357,548
Change in net assets	**879,220**	844,590
Net assets, beginning of the year	**5,501,401**	4,656,811
Net assets, end of the year	**$ 6,380,621**	$ 5,501,401

The government-wide operations are reflected in the statement of activities that reports the overall expenses and revenues for the Township. The major components of the Township's revenues are the general revenues, which consist primarily of property tax revenue of $2,196,019 and $2,148,324 at March 31, 2011 and 2010, respectively. The increase in property tax revenue is due to an increase in the underlying equalized assessed valuation of property located in the Township.

Governmental activities of the Township had $1,392,418 and $1,357,548 in expenses for the year ended March 31, 2011 and 2010, respectively, allocated between general government and highways and streets. Within general government and highways and street services expense, is depreciation expense of $3,409 and $128,873, respectively ($4,913 and $63,542, respectively, in 2010).

The Township's total revenues exceeded expenses by $879,220 and $844,590 for the years ended March 31, 2011 and 2010, respectively.

The financial analysis of the operations by fund, including a comparison of actual to budget operations, allows for a greater understanding of the overall Township operations. The Township adheres to fund accounting to ensure and comply with all finance related legal requirements for townships. The three major operational funds of the Township, which represent 99.09% of the total revenues, are the General Town, Road and Bridge, and Hard Road Funds. The fund financial statements exclude depreciation expense, which is also not a budgeted item.

Financial Analysis (cont'd)

General Town Fund – The General Town Fund's revenues were budgeted at $1,051,190, and the Fund's operations exceeded expectations by 2.2%. The positive variance of $23,098 is mainly attributable to property taxes exceeding budget by $22,020, as the Township was not affected as much as expected by the downturn in the housing market. Actual 2011 revenues of $1,074,288 were an increase of $27,786 over 2010 revenues. This increase was primarily due to an additional $22,035 in property tax revenues, due to an increase in the Township's equalized assessed valuation. The General Town Fund's expenditures were $1,669,755 less than the budget of $2,437,748, or approximately 68% under budget. The primary source of savings was in the office building purchase/expansion expense, which had a budget of $1,500,000 but expenditures of only $67,192, as the project was delayed into the next fiscal year.

Road and Bridge Fund – The Road and Bridge Fund's revenues were budgeted at $381,000, and the Fund's operations fell short of budget by $8,021. Actual 2011 revenues of $372,979 were an increase of $5,578 from 2010 revenues, as both property tax revenue and investment income saw modest increases. The Road and Bridge Fund's expenditures, budgeted at $756,000, had a positive variance to operations of $538,651, as significant savings versus budget were noted in personnel services, road maintenance and capital outlay. Savings in personnel services were due to budgeted positions not being filled, and savings were realized versus budget in road maintenance and capital outlay as some projects came in under budget and some were delayed into the next year.

Hard Road Fund – The Hard Road Fund's revenues were budgeted at $832,200, and the Fund's operations fell short of budget by $28,566. This shortfall was attributable to property taxes falling short of budget. Actual 2011 revenues of $803,634 were an increase of $22,985 over 2010 revenues, primarily due to increased property taxes attributable to a higher equalized assessed valuation of Township property. The Hard Road Fund's expenditures, budgeted at $1,141,200, had a positive variance to operations of $137,925, mainly due to cost savings on personnel and road maintenance.

Nonmajor Funds – The Township's nonmajor funds, which include the General Assistance, Tornado Relief, Park, Culvert and Cemetery Funds, had combined expenditures in excess of revenues of $17,153. Budgets were adopted for the General Assistance, Park and Cemetery Funds. Combined, these three funds had net positive variance to their budget of $115,118, attributable primarily to cost savings realized in the General Assistance and Cemetery Funds in the current year.

Capital Assets – The Township's investment in capital assets as of March 31, 2011 amounts to $4,122,625, net of accumulated depreciation ($3,498,264 net at March 31, 2010). This investment in capital assets includes land, construction in progress, buildings, infrastructure, equipment, vehicles and office equipment. The total increase in the Township's investment in capital assets for the current fiscal year was 17.85%. This increase was due to the completion of the construction of the new Road District building, the construction of a salt dome, and significant road reconstruction in the current year. Additional information on capital assets can be found in Note II.B. on page 25.

Summary and Future Considerations

The Wheatland Township government continued processing voter registrations, issued culvert permits, handled property tax complaints and new resident information requests during the past year.

Summary and Future Considerations (cont'd)

The Wheatland Township Park continues to offer Wheatland Township residents an attractive and comfortable open space for their enjoyment. Organized sporting leagues continue to reserve time for their sporting events, such as soccer, basketball and baseball. The Park Committee continues to explore additional options for improvements and expansion.

The Wheatland Township Cemetery, through its committee, continues to conduct burials and sell gravesites. The Township, with the cooperation of the Highway Department, maintains a respectful and dignified setting.

At the April 2004 Annual Town Meeting, a motion was approved giving the Township the authority to purchase property and/or partner with local government and/or other entity to build a new township facility. The Wheatland Township Board is considering several options for their building expansion needs including the purchase of land for building, lease options, sharing space with another government entity through an intergovernmental agreement, and construction of a new building on their current site. In April 2008, the Township closed on the purchase of approximately two (2) acres of land from the City of Naperville. The parcel is located just east of Route 59, on 103rd Street, adjacent to the Naperville fire station. The City has the right to repurchase the land if construction has not begun within five years of the date of the land sale. The Wheatland Township Board got a five-year extension from the City of Naperville in the current year on the land that was purchased in April 2008. In 2009, the Wheatland Township Board made an offer on a building located at 3440 LaCrosse Lane, Naperville, Illinois 60564 for $77 per square foot. The building is a shell and will require a build out. With the additional space a new facility will offer, the Township plans to add additional services. The services being considered include, but are not limited to, passport photos, food pantry, toys-for-tots and rider assistance.

The Seniors Program will continue to expand its activities to include field trips to various attractions and events. The Township applied for a grant to provide the Seniors of Wheatland Township $10,000 to be used at the new Township Center. The grant will be used to purchase furniture, cooking utensils and a bingo machine.

The equalized assessed valuation for 2010 is $3,123,635,821.

The Road District continues to maintain 63 miles of roadway on a regular basis. It also continues to keep the Township Cemetery and Community Park mowed and manicured, as well as conducting scheduled and emergency brush pickups throughout the Township's unincorporated areas.

The Township will explore new programs in 2011 to continue to enhance the quality of life and safety of our residents.

Requests for Information – This financial report is designed to provide a general overview of the financial operations of the Wheatland Township. Questions concerning any of the information in this report or requests for additional information should be sent to the Township Supervisor, 31W236 91st Street, Naperville, Illinois 60564.

Wheatland Township
Reconciliation of the Statement of Revenues, Expenditures and Changes in Fund Balance of Governmental Funds to the Statement of Activities
For the Year Ended March 31, 2011

Amounts reported for governmental activities in the statement of activities (pages 10 and 11) are different because:

Net change in fund balances - total governmental funds (page 16)	$ 245,131
Governmental funds report capital outlays as expenditures. However, in the statement of activities, the costs of these assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which capital outlay ($756,643) exceeds depreciation ($132,282) in the current period.	624,361
Some expenses reported in the statement of activities do not require the use of current financial resources and, therefore, are not reported as an expenditure in governmental funds. This amount represents the change in compensated absences payable recorded as an expense in the statement of activities.	9,728
Change in net assets of governmental activities (page 11)	$ 879,220

See accompanying notes.

I. Summary of Significant Accounting Policies

A. The Reporting Entity

The Wheatland Township ("the Township") is duly organized and existing under the provisions of the laws of the state of Illinois, and is operating under the provisions of the Township Code of the state of Illinois. The Township is governed by an elected Board of a Township Supervisor and four Township Trustees. The Township includes all funds of its governmental operations and its component units based on financial accountability. Financial accountability includes appointment of the organization's governing body, imposition of will and fiscal dependency. The accompanying financial statements include only those funds of the Township, as there are no other organizations for which it has financial accountability.

The accounting policies and financial statements of Wheatland Township conform to accounting principles generally accepted in the United States of America as applicable to governments. Following is a summary of the more significant policies.

B. Government-wide and Fund Financial Statements

The government-wide financial statements (i.e., the statement of net assets and the statement of activities) report information on all activities of the primary government. The effect of interfund activity has been removed from these statements. Governmental activities, which are normally supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support. All of the Township's activities are considered governmental activities.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment is offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenues include: (1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment, and (2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported as general revenues. Separate financial statements are provided for the governmental funds. Major individual governmental funds are reported as separate columns in the fund financial statements.

I. Summary of Significant Accounting Policies (cont'd)

C. Measurement Focus, Basis of Accounting and Basis of Presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of the related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the flow of current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized when susceptible to accrual (when they are "measurable and available"). "Measurable" means the amount of the transaction can be determined, and "available" means collectible within the current period or soon enough thereafter to pay liabilities of the current period. The government considers all revenues available if they are collected within 60 days after year end. Expenditures are recorded when the related fund liability is incurred, except for unmatured interest on general long-term debt, which is recognized when due, and certain compensated absences and claims and judgments, which are recorded only when the payment is due.

Property taxes and interest earned are susceptible to accrual. Replacement income tax collected and held by the state of Illinois at year end on behalf of the Township is also recognized as revenue. Other receipts become measurable and available when cash is received, and are recognized at that time. The Township reports the following major governmental funds:

General Town Fund – The General Town Fund is the general operating fund of the Township. It is used to account for all financial resources of the general government, except those required to be accounted for in another fund.

Road and Bridge Fund – The Road and Bridge Fund accounts for the activities associated with the maintenance and repair of Township roads, including snow removal, weed control, and road sign and light pole replacement.

Hard Road Fund – The Hard Road Fund accounts for the activities associated with constructing or maintaining gravel, rock, macadam and other hard roads.

I. **Summary of Significant Accounting Policies** (cont'd)

D. **Assets, Liabilities and Net Assets or Equity**

1. **Deposits and Investments**

The Township's cash and cash equivalents are considered to be cash on hand, demand deposits and short-term investments with original maturities of three months or less from the date of acquisition.

Statutes authorize the Township to invest in the following:

- Bonds, notes, certificates of indebtedness, Treasury bills or other securities which are guaranteed by the full faith and credit of the United States as to principal and interest.

- Bonds, notes, debentures or similar obligations of the United States of America or its agencies.

- Savings accounts, certificates of deposit, time accounts, or other investments constituting direct obligations of a bank as defined by the Illinois Banking Act.

- Securities legally issuable by savings and loan associations incorporated under the laws of any state of the United States of America. Share accounts and share certificates of a credit union chartered under the laws of the state of Illinois or United States of America, provided the principal office of the credit union is located within the state of Illinois. Short-term discount obligations of the Federal National Mortgage Association (FNMA). Investments may be made only in financial institutions which are insured by either the Federal Deposit Insurance Corporation or other applicable law for credit unions.

- Short-term obligations (maturing within 180 days of date of purchase) of corporations with assets exceeding five hundred million dollars ($500,000,000). Such obligations must be rated, at the time of purchase, at one of the three highest classifications established by at least two standard rating services. This type of obligation is limited to one-third of the Township's funds available for investment, and cannot exceed 10 percent of the corporation's outstanding obligation.

I. **Summary of Significant Accounting Policies** (cont'd)

D. **Assets, Liabilities and Net Assets or Equity** (cont'd)

1. **Deposits and Investments**

- Money market mutual funds, registered under the Investment Company Act of 1940, which invest only in bonds, notes, certificates of indebtedness, Treasury bills, and other securities which are guaranteed by the full faith and credit of the United States of America as to principal and interest and agrees to repurchase such obligations.

- Repurchase agreements of government securities subject to The Government Securities Act of 1986.

- Illinois Funds.

Investments with maturities of one year or more from the date of purchase are stated at fair value based on quoted market prices. Investments with maturities of one year or less from the date of purchase and nonnegotiable certificates of deposit are stated at amortized cost. Investment income has been allocated to each fund based on investments held by the fund.

2. **Receivables and Payables**

Transactions between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year are referred to as either "interfund receivables/payables" (the current portion of interfund loans), or "advances to/from other funds" (the noncurrent portion of interfund loans). All other outstanding balances between funds are reported as "due to/from other funds." Advances between funds are offset by a fund balance reserve account to indicate that they are not available for appropriation, and are not expendable available resources.

The Township's property taxes are required to be levied by ordinance. A certified copy of the levy ordinance must be filed with the county clerk no later than the last Tuesday in December of each year. Taxes are due and collectible one-half on June 1 and one-half on September 1 of the following year. Property taxes attach as an enforceable lien on property as of January 1.

Property taxes are based on the assessed valuation of the Township's real property as equalized by the state of Illinois. The equalized assessed valuation of real property totaled $3,123,635,821 for the calendar year 2010. The allowance for uncollectible taxes has been stated at 1 percent of the tax levy, to reflect actual experience.

I. **Summary of Significant Accounting Policies** (cont'd)

D. **Assets, Liabilities and Net Assets or Equity** (cont'd)

3. **Capital Assets**

Capital assets, which include property, plant and equipment and infrastructure assets, are reported in the government-wide financial statements. The Township defines capital assets as assets with an initial cost of more than $5,000 and an estimated useful life in excess of two years. Such assets are recorded at historical cost or estimated historical cost, if purchased or constructed. Donated capital assets are recorded at their estimated fair value at the date of donation.

The cost of normal maintenance and repairs that do not add to the value of the assets, or materially extend assets' lives, are not capitalized.

Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest incurred during the construction phase of capital assets of governmental activities is not capitalized.

Property, plant and equipment of the primary government are depreciated using the straight-line method, over the following estimated useful lives:

Infrastructure	25 years
Buildings	40 years
Equipment	5 years
Vehicles	5 years
Office equipment	5 years

4. **Compensated Absences**

It is the government's policy to permit employees to accumulate earned but unused vacation and sick pay benefits. All vacation and sick pay is accrued when incurred in the government-wide financial statements. A liability for these amounts is reported in governmental funds only if they have matured, for example, as a result of employee resignations and retirements. Payments of compensated absences are made by the governmental funds for which the eligible employee's salary is recorded. The balance at March 31, 2011 of $17,239 represented a decrease of $9,728 from the March 31, 2010 balance.

I. Summary of Significant Accounting Policies (cont'd)

D. Assets, Liabilities and Net Assets or Equity (cont'd)

5. Deferred Property Tax Revenue

Property tax revenues are recorded on the "deferred method." Because of the extraordinarily long period of time between the levy date and the receipt of tax distributions from the county collector, property taxes are not "available" to finance the current year's expenditures. For those funds on the modified accrual basis of accounting, the current year's tax levy is recorded as property taxes receivable and deferred tax revenue. The Township prepared its 2010 tax levy to fund operations in the fiscal year ended March 31, 2012, and as a result, the 2010 tax levy is also recorded as deferred revenue in the government-wide financial statements.

6. Fund Equity

In the fund financial statements, governmental funds report reservations of fund balance for amounts that are not appropriable, or are legally segregated by outside parties for use for a specific purpose. Designations of fund balance represent tentative management plans that are subject to change.

II. Detailed Notes For All Fund Types

A. Deposits and Investments

The Township maintains a cash and investment pool that is available for use by all funds. Each fund type's portion of this pool is displayed on the balance sheet as "cash and cash equivalents." In addition, investments are separately held by several of the Township's funds. In addition, the Township has cash on hand of $300.

At year end, the Township's carrying amount of deposits was $2,250,468, and the bank balance was $2,257,583, of which $2,224,992 was covered by federal depository insurance, and $32,591 was uninsured and uncollateralized. In addition, the Township has funds invested with Illinois Funds, a money market fund overseen by the Treasurer of the state of Illinois. Such amounts are not subject to categorization. At year end, the carrying amount and bank balance of the Township's investment in Illinois Funds was $68,733.

II. Detailed Notes For All Fund Types (cont'd)

A. Deposits and Investments (cont'd)

A reconciliation of the Township's cash and cash equivalents is as follows:

Cash on hand	$ 300
Carrying amount of deposits	2,250,468
Carrying amount of Illinois Funds	68,733
Balance sheet - governmental funds - cash and cash equivalents	$ 2,319,501

Interest Rate Risk – This is the risk that changes in the market interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment, the greater the sensitivity of its fair value to changes in market interest rates. In accordance with its investment policy, the Township manages its interest rate risk by structuring its investment portfolio so that the portfolio remains sufficiently liquid to meet operating requirements which may be reasonably anticipated.

Credit Risk – Generally, credit risk is the risk that an issuer of a debt type instrument will not fulfill its obligation to the holder of the investment. This is measured by assignment of a rating by a nationally recognized rating organization. The Township's investments are limited to a money market account with Illinois Funds which is rated AAA.

Custodial Credit Risk – For deposits, this is the risk that, in the event of a bank failure, a government will not be able to recover its deposits. As of March 31, 2011, $32,591 was uninsured and uncollateralized. For investments, this is the risk that in the event of the failure of the counterparty, a government will not be able to recover the value of its investment or collateral securities that are in the possession of another party.

II. Detailed Notes For All Fund Types (cont'd)

B. Capital Assets

Capital asset activity for the year ended March 31, 2011 was as follows:

	Balance, April 1 2010	Additions	Retirements	**Balance, March 31, 2011**
Governmental Activities				
Capital assets, not being depreciated:				
Land	$ 24,000	$ -	$ -	**$ 24,000**
Construction in progress	-	62,912	-	**62,912**
Total capital assets, not being depreciated	24,000	62,912	-	**86,912**
Capital assets, being depreciated:				
Buildings	3,139,300	124,652	-	**3,263,952**
Infrastructure	453,884	510,704	-	**964,588**
Equipment	144,895	-	-	**144,895**
Vehicles	663,281	58,375	-	**721,656**
Office equipment	37,068	-	-	**37,068**
Total capital assets, being depreciated	4,438,428	693,731	-	**5,132,159**
Less accumulated depreciation for:				
Buildings	63,966	91,438	-	**155,404**
Infrastructure	85,945	28,369	-	**114,314**
Equipment	132,596	3,690	-	**136,286**
Vehicles	648,656	5,850	-	**654,506**
Office equipment	33,001	2,935	-	**35,936**
Total accumulated depreciation	964,164	132,282	-	**1,096,446**
Total capital assets, being depreciated, net	3,474,264	561,449	-	**4,035,713**
Governmental activities' capital assets, net	$ 3,498,264	$ 624,361	$ -	**$ 4,122,625**

Depreciation was charged to general government and highways and streets in amounts totaling $3,409 and $128,873, respectively.

II. Detailed Notes For All Fund Types (cont'd)

C. Line of Credit

The Township entered into a line of credit agreement with a local financial institution on May 7, 2009. The agreement matured on May 7, 2010 and was subsequently renewed for another year, and allows for borrowings up to $600,000. Principal is due at maturity and interest at 3.15% is due monthly on the outstanding balance. The Township entered into the agreement to fund construction costs of the new facility, if needed, in advance of tax collections. The Township has not made any draws against the line of credit to date.

III. Other Information

A. Employee Retirement System

Plan Description – The Township's defined benefit pension plan for regular employees provides retirement and disability benefits, post-retirement increases, and death benefits to plan members and beneficiaries. Your employer plan is affiliated with the Illinois Municipal Retirement Fund (IMRF), an agent multiple-employer plan. IMRF acts as a common investment and administrative agent for local governments and school districts in Illinois. Benefit provisions are established by statute and may only be changed by the General Assembly of the State of Illinois. IMRF issues a publicly available financial report that includes financial statements and required supplementary information. That report may be obtained at www.imrf.org.

Funding Policy – As set by statute, Township regular plan members are required to contribute 4.5 percent of their annual covered salary. The statute requires employers to contribute the amount necessary, in addition to member contributions, to finance the retirement coverage of its own employees. The employer contribution rate for calendar year 2010 was 12.21 percent of annual covered payroll. The Township also contributes for disability benefits, death benefits and supplemental retirement benefits, all of which are pooled at the IMRF level. Contribution rates for disability and death benefits are set by the IMRF Board of Trustees, while the supplemental retirement benefits rate is set by statute.

Annual Pension Cost – For the fiscal year ended March 31, 2011, the Township's annual pension cost of $70,463 for the regular plan was equal to the Township's required and actual contributions.

Trend information gives an indication of the progress made in accumulating sufficient assets to pay benefits when due. Required supplementary information can be found on page 29. Trend information for the three fiscal years ended March 31, 2009, 2010 and 2011 is as follows:

III. **Other Information** (cont'd)

A. **Employee Retirement System** (cont'd)

Annual Pension Cost (cont'd)

Fiscal Year Ended April 30,	Annual Pension Cost (APC)	Percentage of APC Contributed	Net Pension Obligation
2009	$ 68,176	100 %	$ -
2010	70,408	100	-
2011	70,463	100	-

The required contribution for 2010 was determined as part of the December 31, 2008 actuarial valuation using the entry age actuarial cost method. The actuarial assumptions at December 31, 2008 included: (a) 7.5 percent investment rate of return (net of administrative and direct expenses), (b) projected salary increases of 4.0 percent a year, attributable to inflation, (c) additional projected salary increases ranging from 0.4 percent to 10.0 percent per year depending on age and service, attributable to seniority/merit, and (d) post-retirement benefit increases of 3 percent annually. The actuarial value of the Township's regular plan assets was determined using techniques that spread the effects of short-term volatility in the market value of investments over a five-year period with a 20 percent corridor between the actuarial and market value of assets. The Township's regular plan's unfunded actuarial accrued liability at December 31, 2008 is being amortized as a level percentage of projected payroll on an open 30 year basis.

Funded Status and Funding Progress – As of December 31, 2010, the most recent actuarial valuation date, the regular plan was 88.92 percent funded. The actuarial accrued liability for benefits was $912,930 and the actuarial value of assets was $811,782, resulting in an underfunded actuarial accrued liability (UAAL) of $101,148. The covered payroll for calendar year 2010 (annual payroll of active employees covered by the plan) was $593,972 and the ratio of the UAAL to the covered payroll was 17 percent.

The schedule of funding progress, presented as RSI following the notes to the financial statements, presents multi-year trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liability for benefits.

III. Other Information (cont'd)

B. Risk Management

The Township is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; illnesses of employees; and natural disasters. These risks are covered by commercial insurance purchased from independent third parties. Settled claims from these risks have not exceeded commercial insurance coverage for the past three fiscal years.

C. Flexible Spending Plan

Effective January 1, 1999, the Township sponsors and administers a flexible benefits spending plan, in which employees who have worked a minimum of 90 days can direct pre-tax contributions to employee-directed benefits, which includes group medical insurance, cancer insurance, intensive care insurance, accident insurance, and hospital indemnity insurance, under the Wheatland Township Flexible Benefits Plan. The cost of the fringe benefit plan to the Township was de minimus for the plan year ended July 31, 2010.

REQUIRED SUPPLEMENTARY FINANCIAL INFORMATION

Wheatland Township
Illinois Municipal Retirement Fund
Required Supplementary Information -
Schedule of Funding Progress
March 31, 2011

Actuarial Valuation Date	Actuarial Value of Assets (a)	Actuarial Accrued Liability (AAL) - Entry Age (b)	Unfunded AAL (UAAL) (b-a)	Funded Ratio (a/b)	Covered Payroll (c)	UAAL as a Percentage of Covered Payroll ((b-a)/c)
12/31/05	$ 533,978	$ 784,022	$ 250,044	68.11%	$ 532,067	46.99%
12/31/06	585,914	896,303	310,389	65.37%	566,557	54.79%
12/31/07	720,232	1,054,211	333,979	68.32%	577,728	57.81%
12/31/08	764,004	1,187,734	423,730	64.32%	594,908	71.23%
12/31/09	836,984	1,104,664	267,680	75.77%	599,590	44.64%
12/31/10	811,782	912,930	101,148	88.92%	593,972	17.03%

On a market value basis, the actuarial value of assets as of December 31, 2010 is $855,760.
On a market basis, the funded ratio would be 93.74%.

See independent auditor's report.

Budgetary Information

Annual budgets are adopted on a basis consistent with accounting principles generally accepted in the United States of America for the General Town Fund and certain Special Revenue Funds. The annual appropriated budget is legally enacted and provides for a legal level of control at the fund level. All annual appropriations lapse at fiscal year end.

The Township follows these procedures in establishing budgetary data reflected in the financial statements:

- The Combined Budget and Appropriations Ordinance is prepared in tentative form by the Township Supervisor, and is made available for public inspection 30 days prior to final Board action. A public hearing is held on the tentative Combined Budget and Appropriations Ordinance to obtain taxpayer comments.

- Prior to July 1, the Budget and Appropriations Ordinance is legally enacted.

- The Board of Township Trustees may:

  - Amend the Budget and Appropriations Ordinance in the same manner as its original enactment.

  - Transfer between items of any fund not exceeding in the aggregate ten percent (10%) of the total amount appropriated in such fund.

  - After six months of the fiscal year, by two-thirds vote, transfer any appropriation item it anticipates to be unexpended to any other appropriation item.

Management cannot amend the Budget and Appropriations Ordinance; however, expenditures may exceed appropriations at the object level. The Board of Trustees, as outlined above, must approve expenditures that exceed individual appropriations at the object level. During the year, no supplemental appropriations were necessary. No budget was adopted for the Tornado Relief Fund and Culvert Fund.

The Township does not use the encumbrance method of accounting. Budgetary funds are controlled by an integrated budgetary accounting system, in accordance with various legal requirements which govern the Township.
